

Troubleshooting and Maintenance of Electro/Pneumatic Systems (MEP1)

Preventative skills
and troubleshooting
1 day course

► The Course

This troubleshooting and maintenance course focuses on the problems that arise when you have equipment running 24/7.

Content:

- Safe working practices
- Typical problems and preventing them
- Logical approach to fault finding
- Practical examples to minimise downtime and maintain quality

All of the courses can be tailored to suit specific industry or business requirements.

This course builds on the Intro (BP1) course and we recommend completing BP1 before moving on to study this one. Course fees are £200 per person. Contact us for pricing of bespoke courses.

Training venues: Cardiff, Plymouth or at your premises

Maximum of 8 people on each course

Courses are run throughout the year.
We can also arrange a bespoke course for your company.
